Line Output Transformer LL1654

The LL1654 is a 5 section line output transformer, 5 k Ω : 600 Ω , for tube amplifiers.
The C-core is an audio core of our own production.

Winding schematics, physical dimensions, pin and mounting hole layout (all dimensions in mm)

Weight:	1.35 kg
Static resistance of each primary winding:	134 Ω
Static resistance of each secondary winding:	15 Ω
Primary inductance (Primaries in series, DC 40 mA, Primary voltage 150V, 50 Hz)	58H
Isolation between windings / between windings and core:	4 kV / 2 kV

Suggested use:
